

# MATERIAL SPECIFICATION

**TEXTAR**

## Textar T0115

### Main Vehicle Application

Renault Truck (RVI)

### Main Brake Manufacturer/Type

S-Cam

### Friction Material Release

OE lining material

### Features and benefits

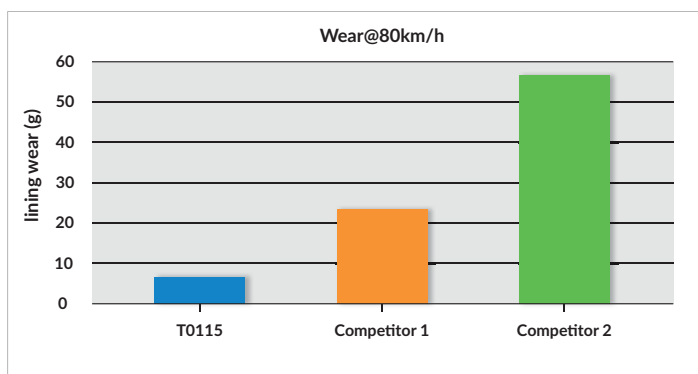

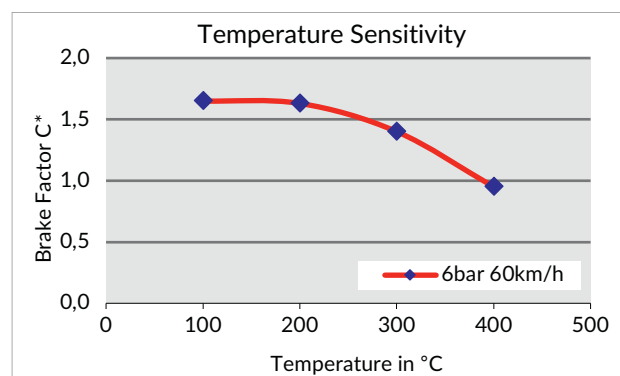

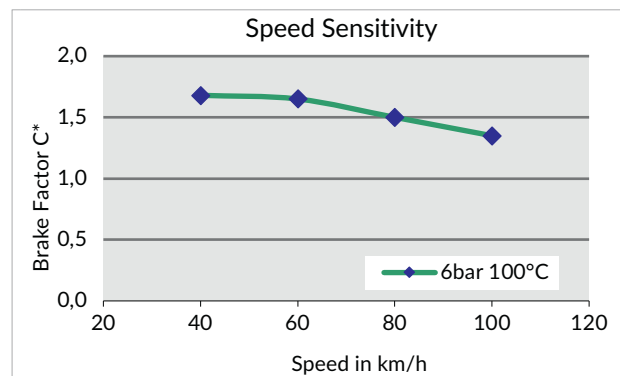

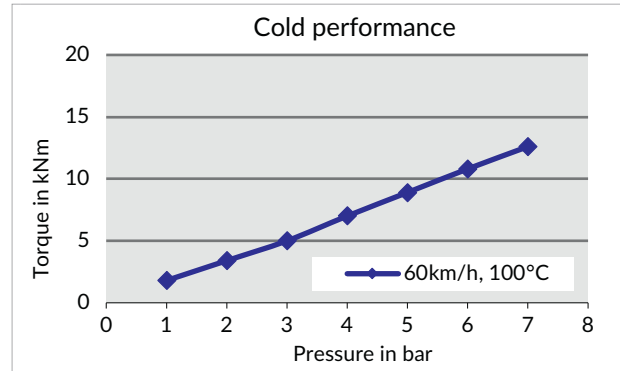

T0115 is a non- asbestos, moulded material whose braking properties include a sustained tolerance to high operating temperatures. This formulation is very kind to brake drums and has excellent resistance to fade.

### General Description

Textar T0115 is an OE lining developed specifically for S-Cam brakes in trucks. This material was developed for the premium segment of the market and has been tested according to specifications of the OE market. It is known to have great speed and temperature sensitivity properties and therefore can perform well in a range of high speed and temperature conditions. The material exhibits a remarkable pad wear characteristic and is compatible to the brake drums.

### Friction Performance/Output

(tested on Mercedes/MAN S-Cam brake, 410x160 mm linings)
