

MEYLE-PD brake discs – cutting-edge coating technology for long-lasting anti-corrosion protection

MEYLE-PD brake discs come as ready-to-mount assemblies, most of them featuring the locating screw. The innovative coating does not require degreasing and prevents undesired discolouration due to heat. The cutting-edge coating technology provides MEYLE-PD

brake discs with long-term anti-corrosion protection while adding a brilliant appearance. Using a low-energy process the MEYLE coating technology also contributes towards safeguarding the environment.

**The safety solution
engineered by one of the
industry's leading experts
in coated brake discs.**

MEYLE-PD brake discs:

- Ready-to-fit design – no degreasing required
- 85% of the current brake disc range come with the locating screw included
- long-term anti-corrosion protection and brilliant appearance
