

## MEYLE-ORIGINAL crankshaft seals for VAG models

### 16 references for over 2,000 vehicle applications

Even the smallest parts can have a major impact on your car. Take for example crankshaft seals: They have to perform several critical tasks:

1. Provide reliable sealing at the engine crankshaft
2. Capture engine speed and crankshaft position
3. Determine both injection and ignition point controlled by the engine timing unit

Early part wear will result in engine start issues, oil loss and odour emissions. Available now, MEYLE offers 16 crankshaft seal rings designed to OE specifications for professional repair. Manufactured from predominately

high quality plastics, the parts are field-proven and distinguished by the excellent wear resistance of the PTFE seal lip.

#### Key specifications of MEYLE-ORIGINAL crankshaft seals at a glance:

- Ready-to-fit design – including dynamic and static sealing and mechanical and magnetic trigger wheel
- Extremely wear resistant thanks to low-friction PTFE seal lip
- Dimensionally stable and lightweight design thanks to the use of a premium-grade plastic base material

Quality down to the very last detail!

#### Information

**The MEYLE engineers recommend:** When doing the regular clutch inspection after 80,000 to 100,000 driven kilometres also inspect and, if necessary, replace the sealing flange module.

MEYLE no.:	Manufacturer	Vehicle applications
<b>100 103 1000</b> Short no. MMX1497	Audi	A1, A3, A4, A5, A6, Q3, Q5, TT
	Seat	Alhambra II, Exeo, Ibiza V, Leon, Altea , Toledo IV
	Skoda	Fabia II, Octavia II, Rapid II
<b>100 103 1001</b> Short no. MMX1498	Audi	A4, A5, A6, A7 Sportback, A8, Q5, Q7
