The above VAG applications were originally equipped with an 18-tooth water pump pulley.

VAG has modified the OES water pump with a 20-tooth pulley. To follow VAG's specifications, SKF has also modified the design of its VKPC 86619 (See *Pic 1*).

When fitting this new water pump on the above listed petrol engines – VAG also recommends the replacement of the camshaft pulley at the same time, with a new pulley (See *Pic 2*).
